**MCH BUDGET DETAILS FOR FY 2011**

[Secs. 504 (d) and 505(a)(3)(4)]

**STATE: WI**

**1. FEDERAL ALLOCATION**

(Item 15a of the Application Face Sheet [SF 424])  
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 10,732,515

A.Preventive and primary care for children:

\$ 3,304,372 ( 30.79%)

B.Children with special health care needs:

\$ 3,556,683 ( 33.14%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 668,371 ( 6.23%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

**2. UNOBLIGATED BALANCE** (Item 15b of SF 424)

\$ 0

**3. STATE MCH FUNDS** (Item 15c of the SF 424)

\$ 9,395,268

**4. LOCAL MCH FUNDS** (Item 15d of SF 424)

\$ 0

**5. OTHER FUNDS** (Item 15e of SF 424)

\$ 0

**6. PROGRAM INCOME** (Item 15f of SF 424)

\$ 7,669,622

**7. TOTAL STATE MATCH** (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 4,721,800

\$ 17,064,890

**8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)**

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 27,797,405

**9. OTHER FEDERAL FUNDS**

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 100,000

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 130,000

g. WIC: \$ 91,296,219

h. AIDS: \$ 1,577,285

i. CDC: \$ 53,888,245

j. Education: \$ 0

k. Other: \$ 0

Eight additional \$ 3,178,750

programs \$ 0

**10. OTHER FEDERAL FUNDS** (SUBTOTAL of all Funds under item 9)

\$ 150,170,499

**11. STATE MCH BUDGET TOTAL**

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 177,967,904

## FORM NOTES FOR FORM 3

None

### FIELD LEVEL NOTES

- Section Number:** Form3\_Main  
**Field Name:** ProgramIncomeExpended  
**Row Name:** Program Income  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**

Local family planning/reproductive health projects reported approximated \$3.17 million more than expected in program income (\$5,504,165 projected vs \$8,521,802). This increase reflects ongoing rising costs of services and supplies, a larger number of clients served, and more thorough reporting.

- Section Number:** Form3\_Main  
**Field Name:** ProgramIncomeExpended  
**Row Name:** Program Income  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**

Program Income  
This variance, an increase of \$3,021,270 (67.3%), is the result of increased income earned by family planning agencies. This increase is due primarily to the substantial increase in the cost of family planning supplies, which is passed on by local provider agencies to clients via sliding fee scales. This exceptionally large increase has led to additional variances for the Children and Other Type of Individuals Served categories on Form 4 and the Direct Type of Services category on Form 5.

**FORM 4**

## FORM NOTES FOR FORM 4

None

### FIELD LEVEL NOTES

1. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** PregWomenExpended

**Row Name:** Pregnant Women

**Column Name:** Expended

**Year:** 2009

**Field Note:**

This variance, an increase of \$1,569,912 (89%), is due primarily to a \$1,01 million increase in Program Income, a \$111,000 increase in Match and a \$184,000 increase in Maintenance of Effort resources. Modest increases in Title V Local Aids and State Operations expenditures also contributed approximately \$165,000.

2. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** PregWomenExpended

**Row Name:** Pregnant Women

**Column Name:** Expended

**Year:** 2008

**Field Note:**

This variance, a decrease of \$864,259 (30.04%), is due to a general decrease in the number of clients in this category served with Title V dollars. This subsequently affects other components of the Federal/State Partnership. Title V funds decreased by \$208,285, Match funds by \$335,267 and Program Income fund by \$320,707.

3. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** Children\_1\_22Expended

**Row Name:** Children 1 to 22 years old

**Column Name:** Expended

**Year:** 2008

**Field Note:**

This variance, an increase of \$1,390,773 (15.73%), is due primarily to a significant increase in Program Income in this category of \$1,527,698. This was off set slightly by minor decreases in Title V spending and Match dollars in this category.

4. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** AllOthersExpended

**Row Name:** All Others

**Column Name:** Expended

**Year:** 2009

**Field Note:**

This variance, an increase of \$1,017,274 (18.7%), is due primarily to a \$1,17 million increase in Program Income. This Program Income increase was slightly offset by minor decreases in Maintenance of Effort resources and Title V Local Aids expenditures.

5. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** AllOthersExpended

**Row Name:** All Others

**Column Name:** Expended

**Year:** 2008

**Field Note:**

This variance, an increase of \$2,067,974 (50.96%), is due almost exclusively to an increase in Program Income of \$1,786,906. An increase in Match funds also contributed to the variance.

6. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** AdminExpended

**Row Name:** Administration

**Column Name:** Expended

**Year:** 2009

**Field Note:**

This variance, an increase of \$105,264 (17%), is due to an error in the 2009 Budgeted calculation. The cost of one position allocated to Administration was inadvertently omitted for the total. When this cost of \$49,546 is included, the total Budgeted Administration cost increases to \$672,629. The variance then becomes \$56,452 or only 8.4%.

7. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership

**Field Name:** AdminExpended

**Row Name:** Administration

**Column Name:** Expended

**Year:** 2008

**Field Note:**

This variance, an increase of \$89,964 (14.74%), is due to an error in the 2008 Budgeted calculation. The cost of one position allocated to Administration was inadvertently omitted from the total. When this cost of \$49,546 is included, the total Budgeted Administration cost increases to \$659,989. The variance then becomes \$40,418, or only 6.1%.

- (1) Use occurrent births as denominator.  
 (2) Report only those from resident births.  
 (3) Use number of confirmed cases as denominator.

## FORM NOTES FOR FORM 6

Occurrent births: For CY 2009, according to the provisional birth file, closed 3/31/10, there were 70,090 occurrent births in Wisconsin; Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics. The count of newborns screened for CY 2009 was 69,533 (99.2%); of the occurrent births, 557 newborns were not screened. These infants were not screened for various reasons: some may have died or parents may have refused screening for religious cultural purposes. Data Issues: NBS data files and birth certificate records are not linked. Provisional occurrent birth data indicate a small discrepancy between the numbers of babies born in Wisconsin and the numbers screened. NBS data includes resident and occurrent births. Resident birth data are not available.

<b>TOTAL</b>	<b>138,274</b>					

## FORM NOTES FOR FORM 7

Sources: 2009 Title V program data and Reproductive Health/Family Planning (RH/FP) data come from SPHERE (Secure Public Health Electronic Record Environment), the data collection system used by agencies receiving Title V funds, 2009 NBS data from the Wisconsin State Laboratory of Hygiene, and 2009 provisional occurrent birth data from the Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics. RH/FP data include persons receiving services supported with Title V (and matching) funds and do not include Title X. RH/FP data from years prior to 2005 included individuals who received services in Title X family planning clinics whose care was partially supported with Title V matching funds. Prior to 2005, agencies supported with Title X family planning funds also received substantial Title V matching funds to support reproductive health care services. Following implementation of the Medicaid Family Planning Waiver, Title X agencies no longer received Title V matching funds. Therefore, individuals receiving services in these clinics did not have a portion of their care supported with Title V funds, and are not included in Form 7. Primary sources of health care coverage are required fields for local agencies that use SPHERE.

The data for primary sources of coverage for infants are: 1) estimates from the 2008 birth file; the 2009 birth file was not available for estimates of primary sources of coverage and NBS data do not have primary sources of coverage; and, 2) SPHERE data from 2009.

Data issues: There are many factors that affect our total numbers of individuals served (unduplicated) under Title V; therefore, from year-to-year, there are random fluctuations. Two of these factors are: data collection by local agencies and change of staff and MCH template objectives that are negotiated with local health departments each year, thereby affecting the numbers served by each agency.

## FIELD LEVEL NOTES

**1. Section Number:** Form7\_Main

**Field Name:** Children\_0\_1\_TS

**Row Name:** Infants <1 year of age

**Column Name:** Title V Total Served

**Year:** 2011

**Field Note:**

Data issues: Total infants <1 year of age equals: 70,090 (the 2009 provisional occurrent birth count) which includes Title V = [5,092 (596 CSHCN infants ) + (4,496 infants)].

The NBS file, birth records, and SPHERE (data collection system used by agencies receiving Title V funds) are not linked; therefore, the Title V infants are included in the total number of infants because it's likely those infants were screened. The percentage of primary source of coverage for Title V infants are: Title XIX – 10.5%, Title XXI – 33.7%, Private/Other – 25.0%, None – 2.8%, Unknown - 28.0%.

**TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT**  
**STATE PROFILE FOR FY 2011**  
*[SEC. 506(A)(1)]*  
**STATE: WI**

1. State MCH Administration:  
(max 2500 characters)

The Title V MCH/CYSHCN Block Grants funds are administered by the Wisconsin Division of Public Health, Bureau of Community Health Promotion, Family Health Section (FHS). The FHS is clearly demarcated within the Division as the designee for administration of the Title V activities. This clear demarcation serves as a critical component to ensure comprehensive program activity and a single point of accountability for the state. The Family Health Section contains the MCH Unit which includes MCH and CYSHCN.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 10,732,515

b. Infants < 1 year old	69,533
c. Children 1 to 22 years old	30,033
d. CSHCN	2,581
e. Others	24,451

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:  
(max 2500 characters)

Wisconsin's Title V funds are distributed to local agencies and organizations (including tribes) on an annual basis through the Division of Public Health's performance-based contracting process. The purpose of performance-based contracting is to help agencies focus on improving health status and health outcomes for Wisconsin's citizens. Performance-based contracting is a non-competitive process for our LHDs and LHDs have the first right of refusal to the allocated funds. Every fall, the Division of Public Health initiates a three-way negotiation process with representatives from the LHDs, the DPH regional office staff, and the DPH central office staff. To make the negotiation process easier, LHDs may (but are not required to) select from a list of template objectives developed specifically by the MCH/CYSHCN Program that align with Wisconsin's and National MCH priority needs for the maternal and child health population. (Template objectives are "pre-approved" activities and, as a result, streamline the negotiation process.) In 2009, the MCH/CYSHCN Program offered 29 template objectives addressing the MCH priorities as identified through the state's 2005 MCH needs assessment. Examples of templates include: pregnancy and healthy outcomes; comprehensive physical exams for uninsured or underinsured children; child passenger safety; home safety assessments; prevention and intervention for early childhood dental caries, newborn home visitation; health education activities; nutrition coalition building; and breastfeeding promotion. These template objectives are reviewed and revised yearly based on input from LHDs and partners, emerging MCH issues, and objective outcomes. The development of new template objectives based on the 2010 MCH Needs Assessment is currently underway. If LHDs do not select a template objective(s), they have the option of creating a separate, distinct objective(s) that met the needs of the maternal and child health population within their jurisdiction. In addition, the objective must be deemed as an acceptable activity by the MCH/CYSHCN Program.

b. Population-Based Services:  
(max 2500 characters)

Request for Proposals for statewide and regional MCH/CYSHCN projects are released on a competitive basis approximately every 5 years. In the Spring 2005, we embarked on a new competitive process with statewide program activities scheduled beginning July 1, 2005, through December 31, 2010. The five statewide projects address services to: improve infant health and reduce disparities in infant mortality; support a genetics system of care; improve child health and prevent childhood injury and death; improve maternal health and maternal care; and create a parent-to-parent matching program for families with CYSHCN. These projects perform under performance-based contracting, with some template objectives. Planning for statewide initiatives for 2011-2015 is underway based on the 2010 MCH Needs Assessment. The creation of five Regional CYSHCN Centers in January 2000 was in response to a series of assessments conducted throughout Wisconsin with families and providers along with technical assistance from national experts over the course of several years. These regional centers are funded for the same funding cycle noted above. The goal of the Centers is to establish regional leadership, as an extension of the state CYSHCN Program and enhance the local capacity to serve children and youth with special health care needs and their families and to meet the six National Performance Measures, as part of the President's New Freedom Initiative. Additional key model elements include: consultation, referral and follow-up; health benefits counseling; medical and dental home; training and technical assistance; and adolescent transitioning to adult care.

c. Infrastructure Building Services:  
(max 2500 characters)

Wisconsin's Title V dollars are at work to build systems including: family planning and reproductive health; perinatal services, newborn blood and hearing screening, early childhood comprehensive services; child health services including oral health, asthma, and injury and violence prevention; children and youth with special health care needs through the support and enhancement of services/resources of regional CYSHCN centers; parent-to-parent support network; poison control services; integration of medical home; and the MCH Hotline (1-800-722-2295) including First Step for families who have children and youth with special health care needs.

## 12. The primary Title V Program contact person:

Name	Linda Hale
Title	Family Health Section Chief
Address	1 West Wilson Street

**FIELD LEVEL NOTES**

None

**FORM 11**  
**TRACKING PERFORMANCE MEASURES**  
[SECS 485 (2)(2)(B)(iii) AND 486 (A)(2)(A)(iii)]  
**STATE: WI**

**Form Level Notes for Form 11**

Form 11 has columns for 2005 – 2009. After the data and accompanying note are entered into the performance measure's table, they are imported into the application's narrative (IV. C, IV. D). 2009 data were required; if 2009 data were not available, 2008 provisional data were entered with an accompanying note. National Performance Measures: Data for these measures are from several sources, including national and state surveys, and data systems maintained by the State of Wisconsin. Data for measures #1 and 12 are CY 2009. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2008 from the Wisconsin Department of Health Services, Office of Health Informatics; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2009 data will not be available until mid-2010. Data for measure #7 are CY 2009 from the CDC's National Immunization Survey. Data for measure #9 were collected during the 2008-09 school year. Data for measure #14 are for CY 2009 from the CDC's Pediatric Nutrition Surveillance System. Negotiated State Performance Measures: Data for these measures are from several sources, including state surveys, national data systems, and data systems maintained by the State of Wisconsin. Data for measure #1 are from the Family Planning Program for CY 2009, data for #2 are from Medicaid data and are SFY 2009, data for #3 are from SPHERE, data for #4, 6, 7, 9, and 10 are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2009 data will not be available until mid-2010. Data for #5 are from the NCHS National Survey of Children's Health. Data for #8 are CY 2009 from the CDC's Pediatric Nutrition Surveillance System. 2009 data are not available until 2010, 2008 data were use for the required 2008 indicator and are marked "provisional."

**PERFORMANCE MEASURE # 01**

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

**Field Level Notes****1. Section Number:** Form11\_Performance Measure #7**Field Name:** PM07**Row Name:****Column Name:****Year:** 2009**Field Note:**

The source of these data is the National Immunization Survey of a random sample of Wisconsin chil.dren who were born between January 2005 and June 2007.

**2. Section Number:** Form11\_Performance Measure #7**Field Name:** PM07**Row Name:****Column Name:****Year:** 2008**Field Note:**

The data entered for 2008 are from the National Immunization Survey for CY 2007. For Wisconsin children 19-35 months of age who had received 4 DTaP, 3 polio, 1 MMR, 3 Hep b and 3 Hib vaccine doses, the estimate was 79.4% with confidence intervals plus or minus 6.4%. Although the 2007 survey's immunization rate estimate for Wisconsin is slightly lower than the 2006 estimate, the difference is not statistically significant. Also, in prior survey years, large urban areas in 15 states (inc. Wisconsin) were over-sampled. When this aspect of the sampling methodology was discontinued in 2007, 14 of these states (inc. Wisconsin) experienced lower rate estimates. While the precise effect of the methodological change is unknown, overall study results suggest a potentially negative impact.

**3. Section Number:** Form11\_Performance Measure #7**Field Name:** PM07**Row Name:****Column Name:****Year:** 2007**Field Note:**

The 2007 data from the National Immunization Survey show that Wisconsin's immunization estimated coverage rates for 4 DTaP, 3 Polio, 1 MMR, 3 Hep b, and 3 hib among kids 19-35 months of age rose from 83.0% in 2005 to 86.8% in 2006. This increase may be due to acceptance and use of the Wisconsin Immunization Registry (WIR).

**PERFORMANCE MEASURE # 08**

The rate of birth (per 1,000) for teenagers aged 15 through 17 years.

**Field Level Notes****1. Section Number:** Form11\_Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2009**Field Note:**

Hearing screening results are reported on the Wisconsin State Lab of Hygiene (WSLH) newborn blood screening card. Data are entered into the WSLH database and messaged to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Processing logic within WE-TRAC filters incoming records and hearing screening results. Records with PASS/PASS results are archived and records for infants with REFER or missing results are placed on a birth hospital queue for follow-up. Hospitals continue to submit delayed hearing screening results via fax to the WSLH.

Wisconsin State Senate Bill 323 was passed during the 2009 legislative session. The bill requires the physician, nurse-midwife, or certified professional midwife who attends a birth to ensure that the infant is screened and that parents are advised of the results. Wisconsin Sound Beginnings, the State of Wisconsin's early hearing detection and intervention (EHDI) program, collaborated with others on the revisions of the bill to include support for follow up services. This bill was signed into law in May 2010.

**2. Section Number:** Form11\_Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2008**Field Note:**

Data on hearing screening are reported on one page of the newborn blood-spot card that goes to the Wisconsin State Lab of Hygiene (WSLH). The data are electronically messaged daily to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Records for infants who show PASS/PASS results are archived; records for infants who REFER in one or both ears are queued for follow-up by the birth hospital. Reports started being generated directly from the WE-TRAC system for 2007 data. This method has allowed issues that occurred in the past, such as duplicate records that were difficult to identify as duplicates and babies with delayed screening or not screened for valid reasons but accounted for, to be corrected. Since the removal of the separable metabolic screening card, hospitals are faxing WE-TRAC users delayed hearing screening results to the WSLH. This is making our user much more responsible for updating their records accurately and in a timely fashion.

**3. Section Number:** Form11\_Performance Measure #12**Field Name:** PM12**Row Name:****Column Name:****Year:** 2007**Field Note:**

Hearing screening data are reported on the newborn blood-spot card that is sent from the birth hospital to the Wisconsin State Lab of Hygiene (WSLH). The data are electronically messaged daily to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Unlike the data reported in previous years from WSLH records, the 2007 data are generated directly from the WE-TRAC system. This method has helped resolve accuracy issues involving duplicate records and delayed records that occurred in the past. The data adhere to the CDC reporting standards for EHDI statistics; i.e., the screened number excludes newborns who were missed in one or both ears, refused screening, or died before screening was possible.

**PERFORMANCE MEASURE # 13**

Percent of children without health insurance.

Data issue: These data are from Wisconsin PRAMS and from the 2007 - 2008 weighted data set that is representative of Wisconsin resident mothers who had a live birth. The survey asks if moms smoked cigarettes in the past 2 years. If the moms answered yes, she's asked the quantity of cigarettes she smoked during the last 3 months of her pregnancy. The numerator represents those mothers who said they smoked during the last three months of pregnancy, and the denominator represents Wisconsin resident mothers.

**2. Section Number:** Form11\_Performance Measure #15**Field Name:** PM15**Row Name:****Column Name:****Year:** 2008**Field Note:**

Data issue: 2008 data will not be available from the Bureau of Health Information and Policy until 2010. Furthermore, the Bureau of Health Information and Policy most likely will not have data for this indicator until 2010 after the revised birth certificate is implemented with a new on-line system (projected to be in place by 2009). Wisconsin was awarded the Pregnancy Risk Assessment Monitoring System (PRAMS) in April, 2006. We do not expect to have data from PRAMS until late 2009.

Source: Wisconsin Department of Health and Family Services, Division of Public Health, Office of Health Informatics.

Data issue: In Wisconsin, hospitals self-designate level of care. Wisconsin does not have a regulatory function to standardize these self-designations. 95% confidence intervals are: 79.6%, 73.9%. Froedtert Hospital (one of the top 10 birthing centers in Wisconsin for number of deliveries) is not included in the above estimate as a facility for high-risk deliveries and neonates. However, infants delivered at Froedtert do have access to such resources, because of a cooperative effort with the Children's Hospital of Wisconsin and the proximity of the two facilities. The Froedtert Birth Center is actually located within Children's Hospital. If Froedtert Hospital were included in the data for 2008 as a facility for high-risk deliveries and neonates, Wisconsin's indicator would be 86.0% instead of 76.7%.

**FORM 11**  
**TRACKING PERFORMANCE MEASURES**  
[SECS 485 (2)(2)(B)(iii) AND 486 (A)(2)(A)(iii)]  
**STATE: WI**

**Form Level Notes for Form 11**

Form 11 has columns for 2005 – 2009. After the data and accompanying note are entered into the performance measure's table, they are imported into the application's narrative (IV. C, IV. D). 2009 data were required; if 2009 data were not available, 2008 provisional data were entered with an accompanying note. National Performance Measures: Data for these measures are from several sources, including national and state surveys, and data systems maintained by the State of Wisconsin. Data for measures #1 and 12 are CY 2009. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2008 from the Wisconsin Department of Health Services, Office of Health Informatics; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2009 data will not be available until mid-2010. Data for measure #7 are CY 2009 from the CDC's National Immunization Survey. Data for measure #9 were collected during the 2008-09 school year. Data for measure #14 are for CY 2009 from the CDC's Pediatric Nutrition Surveillance System. Negotiated State Performance Measures: Data for these measures are from several sources, including state surveys, national data systems, and data systems maintained by the State of Wisconsin. Data for measure #1 are from the Family Planning Program for CY 2009, data for #2 are from Medicaid data and are SFY 2009, data for #3 are from SPHERE, data for #4, 6, 7, 9, and 10 are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2009 data will not be available until mid-2010. Data for #5 are from the NCHS National Survey of Children's Health. Data for #8 are CY 2009 from the CDC's Pediatric Nutrition Surveillance System. 2009 data are not available until 2010, 2008 data were use for the required 2008 indicator and are marked "provisional."

**STATE PERFORMANCE MEASURE # 1 - REPORTING YEAR**

Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.

*[SECS 505 (A)(2)(B)(iii) AND 506 (A)(2)(A)(iii)]*  
**STATE: WI**

**Form Level Notes for Form 12**

2009 data are required by the TVIS, but are not available until mid-2010, therefore, 2008 data were used and indicated as provisional for 2009. These data are maintained in retrospective state databases and are not released or published until 12-18 months after the end of the data year.

**FORM 13**  
**CHARACTERISTICS DOCUMENTING FAMILY PARTICIPATION IN CSHCN PROGRAMS**  
**STATE: WI**

1. Family members participate on advisory committee or task forces and are offering training, mentoring, and reimbursement, when appropriate.

3

2. Financial support (financial grants, technical assistance, travel, and child care) is offered for parent activities or parent groups.

2

3. Family members are involved in the Children with Special Health Care Needs elements of the MCH Block Grant Application process.

3

4. Family members are involved in service training of CSHCN staff and providers.

3

5. Family members hired as paid staff or consultants to the State CSHCN program (a family member is hired for his or her expertise as a family member).

3

6. Family members of diverse cultures are involved in all of the above activities.

**FORM NOTES FOR FORM 13**

None

**FIELD LEVEL NOTES**

None

**FORM 14**  
**LIST OF MCH PRIORITY NEEDS**

[Sec. 505(a)(5)]

**STATE: WI FY: 2011**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce health disparities for women, infants, and children, including those with special health care needs.
2. Increase the number of women, children, and families who receive preventive and treatment health services within a medical home.
3. Increase the number of children and youth with special health care needs and their families who access necessary services and supports.
4. Increase the number of women, men, and families who have knowledge of and skills to promote optimal infant and child health, development, and growth.
5. Increase the number of women, children, and families who have optimal mental health and healthy relationships.
6. Increase the number of women, men, and families who have knowledge of and skills to promote optimal reproductive health and pregnancy planning.
7. Increase the number of women, children, and families who receive preventive screenings, early identification, and intervention.
8. Increase the number of women, children, and families who live in a safe and healthy community.
- 9.

**FORM NOTES FOR FORM 15**

None

**FIELD LEVEL NOTES**

None

**FORM 16**  
**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: WI**

SP(Reporting Year) # 1

**PERFORMANCE MEASURE:**

Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.

**STATUS:**

Active

**GOAL**

Increase the percent of income eligible reproductive-age women in Wisconsin who are enrolled in the Wisconsin Medicaid Family Planning Waiver.

**DEFINITION**

The percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver.

**Numerator:**

Number of women enrolled in the Family Planning Waiver

**Denominator:**

Number of women, ages 15-44, estimated to be Medicaid income eligible minus those who have existing Medicaid/BadgerCare coverage.

**Units:** 100    **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

9.3

Increase the proportion of females at risk of unintended pregnancy (and their partners) who use contraception.

**DATA SOURCES AND DATA ISSUES**

Enrollment data from Wisconsin Department of Health Services, Division of Health Care Access and Accountability, Medicaid program data.

**SIGNIFICANCE**

Access to affordable and quality contraceptive and related reproductive health services is necessary for increased use of contraception among sexually active women and couples at risk of unintended pregnancy.

SP(Reporting Year) # 2

**PERFORMANCE MEASURE:**

Percent of Medicaid and BadgerCare recipients, ages 3-20, who received any dental service during the reporting year.

**STATUS:**

Active

**GOAL**

To increase the percentage of Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**DEFINITION**

Percent of Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**Numerator:**

Numerator: Number of Wisconsin Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**Denominator:**

Denominator: Total number of Wisconsin Medicaid and BadgerCare, aged 3-20, recipients during the state fiscal year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

21-12

Increase the proportion of children and adolescents under age 19 years of age at or below 200 percent of the Federal poverty level who received any preventive dental service during the past year.

21-10

Increase the proportion of children and adults who use the oral health care system each year.

**DATA SOURCES AND DATA ISSUES**

Wisconsin Department of Health Services, Division of Health Care Access and Accountability, Medicaid Program, claims and eligibility data for services provided.

**SIGNIFICANCE**

Oral diseases and conditions can be consequential to growth, function, ability to attend to learning, self-image and employability. The most frequent symptom of dental pathology is pain which can distract children from learning and playing, and limit their ability to eat and speak. Extensive early childhood caries has been shown to inhibit attainment of normal weight and height in toddlers. Dental and oral diseases are increasingly understood to compromise general health and function. Dental visits increase with increasing income and parental education. Low-income children who suffer from the most dental disease have the least access to care, despite publicly financed dental coverage.

**PERFORMANCE MEASURE:**

Percent of children, ages 6 months-5 years, who have age-appropriate social and emotional developmental levels.

**STATUS:**

Active

**GOAL**

To increase the percentage of children with age-appropriate social and emotional developmental levels.

**DEFINITION**

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental levels.

**Numerator:**

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental levels.

**Denominator:**

The number of children, ages 6 months through 5 years, who receive mental health screening using the "Ages and Stages Questionnaire: Social and Emotional Domain during the reporting period (ASQ:SE)."

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

18-7

Increase the proportion of children with mental health problems who receive treatment.

**DATA SOURCES AND DATA ISSUES**

Secure Public Health Electronic Record Environment (SPHERE) data reported by agencies who perform mental health screening for young children using the "Ages and Stages Questionnaire®: Social-Emotional (ASQ:SE)". This questionnaire/screening tool assesses children's social-emotional development at 6, 12, 18, 24, 30, 36, 48, and 60 months.

**SIGNIFICANCE**

Infant and early childhood mental health is of growing interest in public health. Wisconsin Governor Jim Doyle's KidsFirst Initiative recommends implementation of the Wisconsin Infant and Early Childhood Mental Health Plan developed by the Wisconsin Initiative for Infant Mental Health. One of the key recommendations is mental health screening and referral for children birth to age five. SPHERE collects information on developmental screening provided by POCAN, Home Visitation Outcomes Projects, and Title V-funded projects (local health departments and private non-profits including CYSHCN Regional Centers and Regional Center contractees), and Tribal Agencies (Honoring our Children). POCAN is the acronym for the comprehensive targeted home visiting program authorized under 46.515 Wisconsin statutes and stands for Prevention of Child Abuse and Neglect. In 2004, 2,662 Wisconsin children under six years of age received a developmental assessment.

SP(Reporting Year) # 4

**PERFORMANCE MEASURE:**

Rate per 1,000 of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.

**STATUS:**

Active

**GOAL**

To decrease the number of children, ages 0-17, being maltreated in Wisconsin during the reporting year.

**DEFINITION**

The number of substantiated reports of child maltreatment to Wisconsin children, ages 0-17, during the calendar year.

**Numerator:**

The number of child abuse and neglect reports and substantiations in a given calendar year.

**Denominator:**

The number of children under age 18.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

15-33

Reduce maltreatment and maltreatment fatalities of children.

15-34

Reduce the rate of physical assault by current or former intimate partners (for persons 12 and older).

**DATA SOURCES AND DATA ISSUES**

Annual Report to the Governor and Legislature on Wisconsin Child Abuse and Neglect, Bureau of Program Integrity, Division of Safety and Permanence, Division of Children and Family Services.

**SIGNIFICANCE**

Child maltreatment has physical, psychological, behavioral and societal consequences that can lead into long-term physical and mental health problems and economic consequences.

**PERFORMANCE MEASURE:**

Percent of children who receive coordinated, ongoing comprehensive care within a medical home.

**STATUS:**

Active

**GOAL**

To increase the percentage of Wisconsin children who have a medical home.

**DEFINITION**

The American Academy of Pediatrics describes care from a medical home as accessible, continuous, coordinated, family-centered, comprehensive, compassionate and culturally-competent.

**Numerator:**

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

**Denominator:**

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

**Units:** 100    **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

1-4. Access to quality health services.  
Increase the proportion of persons who have a specific source of ongoing care.

**DATA SOURCES AND DATA ISSUES**

National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

**SIGNIFICANCE**

A medical home is an approach to providing continuous and comprehensive primary care in a high-quality and cost-effective manner.

**PERFORMANCE MEASURE:**

Percent of children less than 12 years of age who receive one physical exam a year.

**STATUS:**

Active

**GOAL**

Increase the percent of children less than 12 years of age who receive one physical exam per year.

**DEFINITION**

The percent of children less than 12 years of age who receive one physical exam a year.

**Numerator:**

Weighted number of children who received at least one physical exam within the past year.

**Denominator:**

Census estimate of children during calendar year.

**Units:** 100    **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin Department of Healthy Services, Bureau of Health Information and Policy, Wisconsin Family Health Survey.

**SIGNIFICANCE**

Health maintenance through primary care services, including well child check-ups results in early detection and treatment of health problems and improves the chances of leading a healthy life. The implementation of Wisconsin's Children's Health Insurance Program (BadgerCare) will increase health care utilization by children birth to 12 years of age.

**PERFORMANCE MEASURE:**

Percent of women who use tobacco during pregnancy.

**STATUS:**

Active

**GOAL**

Decrease the percent of women who use tobacco during pregnancy.

**DEFINITION**

**Numerator:**  
Number of women who self-report the use of tobacco during pregnancy during the calendar year.  
**Denominator:**  
Total number of live births toWisconsin women per calendar year.  
**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin birth certificate data file.

**SIGNIFICANCE**

Wisconsin's maternal smoking rate (16.5% in 2000) is above the national average (12.2% in 2000). Poor pregnancy outcomes due to maternal smoking are well documented. These substances can endanger the pregnancy and the newborn's health (low birth weight, higher risk of unsuccessful pregnancy and premature birth, and other health problems).

<b>PERFORMANCE MEASURE:</b>	Percent of children, ages 2-4, who are obese or overweight at or above the 95th percentile.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce the percent of children, ages 2-4, who are obese or overweight
<b>DEFINITION</b>	<p>The percentage of children, ages 2 to 5 years, receiving WIC services who are obese or overweight at or above the 95th percentile.</p> <p><b>Numerator:</b> Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin at =&gt; 95 percentile during the reporting period.</p> <p><b>Denominator:</b> Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin during the reporting period.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>

**HEALTHY PEOPLE 2010 OBJECTIVE**

<b>DATA SOURCES AND DATA ISSUES</b>	CDC, Pediatric Nutrition Surveillance System (PedNSS)/WIC data.
<b>SIGNIFICANCE</b>	Childhood and adolescent obesity can lead to negative psychosocial and medical conditions. Medical conditions related to child and adolescent obesity can be both short and long-term. Overweight and obese children are at risk for sleep apnea, orthopedic complications, Type 2 diabetes, and elevated levels of cholesterol, blood pressure, triglycerides, and fasting insulin. Overweight adolescents have a 1.5 to 2-fold increased risk for being overweight as adults. As a result, they are also at increased risk for long-term medical conditions such as coronary heart disease, colon cancer, diabetes, asthma, and arthritis.

SP(Reporting Year) # 9

**PERFORMANCE MEASURE:**

Ratio of the black infant mortality rate to the white infant mortality rate.

**STATUS:**

Active

**GOAL**

To reduce the disparity (ratio) between the black and white infant mortality rates.

**DEFINITION**

Ratio of the black infant mortality rate to the white infant mortality rate.

**Numerator:**

The black infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Denominator:**

The white infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Units:** 1 **Text:** Ratio

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

State vital records.

**SIGNIFICANCE**

A significant gap exists in Wisconsin between the infant mortality rates (IMR) of African American and white infants. Infants born to African American women in Wisconsin are almost three times as likely to die in the first year of life than infants born to white mothers. This disparity of 3 to 1 exceeds the disparity of 2.4 to 1 for the nation as a whole. Although the overall IMR for Wisconsin declined from 17 infant deaths per 1,000 live births in 1970 to 7.2 per 1,000 in 1998, the IMR for African American babies hovered near 18 per 1,000 live births for the last decade. The IMR for whites was 5.6 infant deaths per 1,000 live births in 1998 compared to the black rate of 17.9 per 1,000 live births. This trend continued in 1999 and 2000.

PERFORMANCE MEASURE:	Death rate per 100,000 among youth, ages 15-19, due to motor vehicle crashes.
STATUS:	Active
GOAL	To decrease the number of deaths to youths, ages 15-19, due to motor vehicle crashes.
DEFINITION	<p><b>Numerator:</b> The number of deaths from motor vehicle crashes in Wisconsin to youths, ages 15-19, during the reporting period.</p> <p><b>Denominator:</b> The number of youths in Wisconsin, ages 15-19, during the reporting period.</p> <p><b>Units:</b> 100000    <b>Text:</b> Rate</p>
HEALTHY PEOPLE 2010 OBJECTIVE	
DATA SOURCES AND DATA ISSUES	Wisconsin death certificate data file.
SIGNIFICANCE	Motor vehicle crashes are the leading cause of death for youth. Wisconsin's young drivers are more likely to be in a motor vehicle crash than any other age group.

**FORM 17**  
**HEALTH SYSTEMS CAPACITY INDICATORS**  
**FORMS FOR HSCI 01 THROUGH 04, 07 & 08 - MULTI-YEAR DATA**  
**STATE: WI**

**Form Level Notes for Form 17**

None

**HEALTH SYSTEMS CAPACITY MEASURE # 01**

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	<u>Annual Indicator Data</u>				
	2005	2006	2007	2008	2009
Annual Indicator	27.0	27.0	20.9	18.4	18.4
Numerator	926	926	751	674	674
Denominator	342,755	342,755	358,829	365,316	365,316

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

**Field Level Notes**

1. **Section Number:** Form17\_Health Systems Capacity Indicator #03

**Field Name:** HSC03

**Row Name:**

**Column Name:**

**Year:** 2009

**Field Note:**

Source: DSS Data Warehouse, 2010. Data issue: the data for SFY 2009 indicate a decrease and were 84.6% compared to 92.5% in SFY2008. This decrease is interpreted cautiously because the State's Medicaid indicators came from a different data warehouse than previous years and the data contractor used a different methodology to calculate the indicator; the increases in the numerator and denominator may be due to medical status codes overlapping the FPL and there may be duplication.

2. **Section Number:** Form17\_Health Systems Capacity Indicator #03

Is the Data Provisional or Final?				Final	Final

**Field Level Notes****1. Section Number:** Form17\_Health Systems Capacity Indicator #08**Field Name:** HSC08**Row Name:****Column Name:****Year:** 2009**Field Note:**

As of December 2009, 16,929 children under the age of 16 received SSI benefits and are automatically eligible for the Wisconsin Medicaid Program. The CYSHCN Program provided information and resource materials to 2,541 families who made application to SSI. Direct services were provided through MCH programs and the CYSHCN Regional Centers to 269 clients less than 16 years of age on SSI.

Data issues: The denominator, 16,929 is provided by the Social Security Administration through an informal agreement between SSA and Healthy and Ready to Work (HRTW) and can be found at <http://www.hrtw.org/youth/data.html> SSI Stats. The numerator is the same as all SSA recipients are automatically eligible for the Wisconsin Medicaid program. All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Title V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Wisconsin Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have applied for SSI benefits. In 2009, 2,541 families were sent information from the CYSHCN Program about the CYSHCN Regional Centers, Family Voices, Birth to 3 and other disability resources, whether or not the child was found eligible for SSI.

**2. Section Number:** Form17\_Health Systems Capacity Indicator #08**Field Name:** HSC08**Row Name:****Column Name:****Year:** 2008**Field Note:**

The denominator, 15,793 is in a report from the Social Security Administration and the numerator is the same. Data Issue: All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin's Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Title V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have applied for SSI benefits. The CYSHCN program provided information and resource materials to 2,040 families who made application to SSI. Direct services were provided to 248 clients less than 16 years of age on SSI through agencies reporting in SPHERE.

**3. Section Number:** Form17\_Health Systems Capacity Indicator #08**Field Name:** HSC08**Row Name:****Column Name:****Year:** 2007**Field Note:**

The denominator, 15,289 is in a report from the Social Security Administration and the numerator is the same. Data Issue: All SSI beneficiaries less than 16 years old are automatically eligible for Wisconsin's Medicaid Program which provides comprehensive rehabilitative services. This indicator is consistent with other states with universal Medicaid coverage for these services. Title V's role is focused on assuring families are aware of and enrolled in SSI. As such, under an MOU agreement, the Disability Determination Bureau of SSA electronically provides the CYSHCN program names and addresses of children under age 16 who have applied for SSI benefits. In 2007, 2,416 families were sent information from the CYSHCN program about the regional CYSHCN Centers, Family Voices, Birth to 3 and other disability resources, whether or not they were found eligible for SSI.

**STATE: WI**

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	No
Other: Wisconsin Youth Tobacco Survey	3	Yes
Wisconsin PRAMS (Pregnancy Risk Assessment Monit	3	No

\*Where:  
1 = No  
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.  
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

**Notes:**  
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

## FORM NOTES FOR FORM 19

None

### FIELD LEVEL NOTES

1. **Section Number:** Form19\_Indicator 09A

**Field Name:** RecentMother

**Row Name:** Survey of recent mothers at least every two years (like PRAMS)

**Column Name:**

**Year:** 2011

**Field Note:**

Wisconsin was awarded PRAMS in April 2006. We have finished our third year of data collection for 2009. We are analyzing data for 2007 and 2008 from a combined dataset. Wisconsin PRAMS is a collaborative project between the Office of Health Informatics and the Bureau of Community Health Promotion.

2. **Section Number:** Form19\_Indicator 09B

**Field Name:** YRBSS\_09B

**Row Name:** Youth Risk Behavior Survey (YRBS)

**Column Name:**

**Year:** 2011

**Field Note:**

The Wisconsin Youth Risk Behavior Survey (YRBS) is administered every other year by the Wisconsin Department of Public Instruction in collaboration with the Wisconsin Division of Public Health; the 2009 survey is the most recent one available.

3. **Section Number:** Form19\_Indicator 09B

**Field Name:** Other1\_09B

**Row Name:** Other

**Column Name:**

**Year:** 2011

**Field Note:**

The Wisconsin Youth Tobacco Survey is a comprehensive measure of youth awareness, attitudes, and related behaviors about tobacco in Wisconsin. The survey is conducted in both public middle and high schools during the spring semester of even years (2008, 2010).

Wisconsin was awarded PRAMS in April 2006. Results and findings are being disseminated from the 2007-2008 data set. Wisconsin PRAMS is a collaborative project between the Office of Health Informatics and the Bureau of Community Health Promotion (which administers Title V, Division of Public Health).

**FORM 20**  
**HEALTH STATUS INDICATORS #01-#05**  
**MULTI-YEAR DATA**  
**STATE: WI**

**Form Level Notes for Form 20**

None

**HEALTH STATUS INDICATOR MEASURE # 01A**

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2005	2006	2007	2008	2009
Annual Indicator	7.0	6.8	7.0	7.0	7.0
Numerator	4,992	4,994	5,089	5,051	5,051
Denominator	70,934	73,202	72,757	72,002	72,002

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

## FORM NOTES FOR FORM 21

Data for Form 21 are from several sources, including the US Census, Wisconsin government agencies (Departments of Health Services, Public Instruction, and Office of Justice Assistance).

HSI#06A: US Census.

HSI#07A: 2008 data. In Wisconsin, all live births were classified by race or Hispanic origin of mother into one of six categories: non-Hispanic white, non-Hispanic black/African American, non-Hispanic American Indian, Hispanic/Latino, non-Hispanic Laotian/Hmong, and non-Hispanic other (which are mostly Asian). Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics.

HSI#08A: 2008 data. Wisconsin Department of Health Services, Division of Public Health, Office of Health Informatics.

HSI#09A: The form has a checkbox for whether the data are provisional or final; the data for this form are both provisional and final - depending on the indicator; to clear the form, we checked "provisional". The data for this form come from several sources. Classification of data indicators as required by race/ethnicity are difficult because the race/ethnic classifications are not standardized across agencies.

HSI#10: US Census.

HSI#11: US Census.

HSI#12: US Census.

**TRACKING PERFORMANCE MEASURES**  
[SECS 485 (2)(2)(B)(iii) AND 486 (A)(2)(A)(iii)]  
**STATE: WI**

**Form Level Notes for Form 11**

Form 11 has columns for 2005 – 2009. After the data and accompanying note are entered into the performance measure's table, they are imported into the application's narrative (IV. C, IV. D). 2009 data were required; if 2009 data were not available, 2008 provisional data were entered with an accompanying note. National Performance Measures: Data for these measures are from several sources, including national and state surveys, and data systems maintained by the State of Wisconsin. Data for measures #1 and 12 are CY 2009. Data for measures #2, 3, 4, 5, and 6 are from the National Center for Health Statistics (NCHS) State and Local Area Integrated Telephone Survey (SLAITS) CSHCN module. Data for measures #8, 10, 13, 15, 16, 17, and 18 are for CY 2008 from the Wisconsin Department of Health Services, Office of Health Informatics; these data are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2009 data will not be available until mid-2010. Data for measure #7 are CY 2009 from the CDC's National Immunization Survey. Data for measure #9 were collected during the 2008-09 school year. Data for measure #14 are for CY 2009 from the CDC's Pediatric Nutrition Surveillance System. Negotiated State Performance Measures: Data for these measures are from several sources, including state surveys, national data systems, and data systems maintained by the State of Wisconsin. Data for measure #1 are from the Family Planning Program for CY 2009, data for #2 are from Medicaid data and are SFY 2009, data for #3 are from SPHERE, data for #4, 6, 7, 9, and 10 are maintained in retrospective state databases and are not released or published until 18 months after the end of the data year; therefore, 2009 data will not be available until mid-2010. Data for #5 are from the NCHS National Survey of Children's Health. Data for #8 are CY 2009 from the CDC's Pediatric Nutrition Surveillance System. 2009 data are not available until 2010, 2008 data were use for the required 2008 indicator and are marked "provisional."

**STATE PERFORMANCE MEASURE # 1 - NEW FOR NEEDS ASSESSMENT CYCLE 2011-2015**

Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.

**STATE: WI**

SP(New for Needs Assessment cycle 2011-2015) # 1

<b>PERFORMANCE MEASURE:</b>	Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.
<b>STATUS:</b>	Active
<b>GOAL</b>	Increase the percent of income eligible reproductive-age women in Wisconsin who are enrolled in the Wisconsin Medicaid Family Planning Waiver.
<b>DEFINITION</b>	<p>The percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver.</p> <p><b>Numerator:</b> Number of women enrolled in the Family Planning Waiver</p> <p><b>Denominator:</b> Number of women, ages 15-44, estimated to be Medicaid income eligible minus those who have existing Medicaid/BadgerCare coverage.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	<p>9.3</p> <p>Increase the proportion of females at risk of unintended pregnancy (and their partners) who use contraception.</p>
<b>DATA SOURCES AND DATA ISSUES</b>	Enrollment data from Wisconsin Department of Health Services, Division of Health Care Access and Accountability, Medicaid program data.
<b>SIGNIFICANCE</b>	Access to affordable and quality contraceptive and related reproductive health services is necessary for increased use of contraception among sexually active women and couples at risk of unintended pregnancy.

<b>PERFORMANCE MEASURE:</b>	Percent of children who receive coordinated, ongoing comprehensive care within a medical home.
<b>STATUS:</b>	Active
<b>GOAL</b>	To increase the percentage of Wisconsin children who have a medical home.
<b>DEFINITION</b>	<p>The American Academy of Pediatrics describes care from a medical home as accessible, continuous, coordinated, family-centered, comprehensive, compassionate and culturally-competent.</p> <p><b>Numerator:</b> Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.</p> <p><b>Denominator:</b> Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	<p>1-4. Access to quality health services.</p> <p>Increase the proportion of persons who have a specific source of ongoing care.</p>
<b>DATA SOURCES AND DATA ISSUES</b>	National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.
<b>SIGNIFICANCE</b>	A medical home is an approach to providing continuous and comprehensive primary care in a high-quality and cost-effective manner.

<b>PERFORMANCE MEASURE:</b>	Percent of Black, non-Hispanic women who have had a live birth who report symptoms of depression after pregnancy.
<b>STATUS:</b>	Active
<b>GOAL</b>	Reduce the number of non-Hispanic Black women who experience postpartum depression at a higher rate than non-Hispanic white women.
<b>DEFINITION</b>	<p>The percent of non-Hispanic Black women who report symptoms of depression after pregnancy.</p> <p><b>Numerator:</b> Weighted number of Black, non-Hispanic women who had a live birth who reported that they always or often felt down, depressed or hopeless since their new baby was born on the Wisconsin Pregnancy Risk Assessment Monitoring System (PRAMS).</p> <p><b>Denominator:</b> Weighted number of Black, non-Hispanic women represented in the Wisconsin Pregnancy Risk Assessment Monitoring System within the past year.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	No specific HP2010 Objective for postpartum depression.
<b>DATA SOURCES AND DATA ISSUES</b>	Wisconsin PRAMS is a state-based survey that can be generalized to Wisconsin resident women who delivered a live born infant during the calendar year. These data have been weighted according to the uniform procedure established by the Centers for Disease Control for all states and territories participating in PRAMS. For Wisconsin, this is particularly important because the non-Hispanic Black population was intentionally oversampled to assure these responses will be given weight equal to their actual proportional representation in the population.
<b>SIGNIFICANCE</b>	Perinatal mood disorders are potentially devastating conditions that affect women during pregnancy and after childbirth. Postpartum depression is a perinatal mood disorder under-diagnosed and under-treated. Early identification, evaluation and treatment of postpartum depression is needed to enhance the well being of women, their infants and families. It is estimated that 8 to 15% of Wisconsin women suffer from clinically significant postpartum depression; this number increases to 28% for women living in poverty. African American women in Wisconsin are disproportionately affected by postpartum depression.

<b>PERFORMANCE MEASURE:</b>	Percent of women who have had a live birth who report having an unintended or unwanted pregnancy.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce unintended and unwanted pregnancies.
<b>DEFINITION</b>	<p>The percent of women who report having an unintended or unwanted pregnancy during the reporting year.</p> <p><b>Numerator:</b> Weighted number of women who delivered a live birth who reported that they had wanted to get pregnant later, hadn't wanted to get pregnant then or in the near future, or weren't sure what they wanted on the annual Wisconsin Pregnancy Risk Assessment Monitoring System (PRAMS).</p> <p><b>Denominator:</b> Weighted number of women who had a live birth represented in the Wisconsin Pregnancy Risk Assessment Monitoring System within the past year.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	Objective 9-1: Increase the proportion of pregnancies that are intended.
<b>DATA SOURCES AND DATA ISSUES</b>	Wisconsin PRAMS is a state-based survey that can be generalized to Wisconsin resident women who delivered a live born infant during the calendar year. These data have been weighted according to the uniform procedure established by the Centers for Disease Control for all states and territories participating in PRAMS. For Wisconsin, this is particularly important because the non-Hispanic Black population was intentionally oversampled to assure these responses will be given weight equal to their actual proportional representation in the population.
<b>SIGNIFICANCE</b>	Pregnancies which are unintended and/or are unplanned result in poorer health outcomes, higher occurrence of perinatal/postpartum depressions, higher number of abortions, increased child maltreatment and other negative outcomes for pregnant women, infants and children.

<b>PERFORMANCE MEASURE:</b>	Rate per 1,000 of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.
<b>STATUS:</b>	Active
<b>GOAL</b>	To decrease the number of children, ages 0-17, being maltreated in Wisconsin during the reporting year.
<b>DEFINITION</b>	<p>The number of substantiated reports of child maltreatment to Wisconsin children, ages 0-17, during the calendar year.</p> <p><b>Numerator:</b> The number of child abuse and neglect reports and substantiations in a given calendar year.</p> <p><b>Denominator:</b> The number of children under age 18.</p> <p><b>Units:</b> 1000    <b>Text:</b> Rate</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	<p>15-33 Reduce maltreatment and maltreatment fatalities of children.</p> <p>15-34 Reduce the rate of physical assault by current or former intimate partners (for persons 12 and older).</p>
<b>DATA SOURCES AND DATA ISSUES</b>	Annual Report to the Governor and Legislature on Wisconsin Child Abuse and Neglect, Bureau of Program Integrity, Division of Safety and Permanence, Division of Children and Family Services.
<b>SIGNIFICANCE</b>	Child maltreatment has physical, psychological, behavioral and societal consequences that can lead into long-term physical and mental health problems and economic consequences.

<b>PERFORMANCE MEASURE:</b>	Percent of children age 10 months to 5 years who received a standardized screening for developmental or behavioral problems.
<b>STATUS:</b>	Active
<b>GOAL</b>	To improve early detection of delays in children and improve child health and well-being for identified children.
<b>DEFINITION</b>	<p>Percent of children age 10 months to 5 years who received a standardized screening for developmental or behavioral problems.</p> <p><b>Numerator:</b> Weighted number of children who report receipt of a standardized screening on the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.</p> <p><b>Denominator:</b> Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention</p> <p><b>Units:</b> 100 <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	HP 2010 Objective: There are no objectives or related objectives defined in HP2010
<b>DATA SOURCES AND DATA ISSUES</b>	National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention. In 2007, only 25.9% of Wisconsin children were reported to have received a standardized screening for developmental or behavioral problems.
<b>SIGNIFICANCE</b>	Many children with behavioral or developmental disabilities are missing vital opportunities for early detection and intervention. The American Academy of Pediatrics (AAP) and the American Academy of Neurology recommend that all infants and young children be screened for developmental delays periodically in the context of office-based primary care.

<b>PERFORMANCE MEASURE:</b>	Percent of children under 1 year of age enrolled in Wisconsin's Birth to 3 Program during the calendar year.
<b>STATUS:</b>	Active
<b>GOAL</b>	To improve receipt of early intervention services and improve child health and well-being for children with developmental delays.
<b>DEFINITION</b>	<p>Number of infants and toddlers birth to age 1 with an Individualized Family Service Plans (IFSPs).</p> <p><b>Numerator:</b> Number of infants and toddlers birth to age 1 with an Individual Family Service Plans (IFSPs)during the calendar year.</p> <p><b>Denominator:</b> Number of infants and toddlers birth to age 1 in Wisconsin during the calendar year.</p> <p><b>Units:</b> 100   <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	There are no objectives or related objectives defined in HP2010.
<b>DATA SOURCES AND DATA ISSUES</b>	Wisconsin Department of Health Services, Bureau of Long Term Care, Birth to 3 Program.
<b>SIGNIFICANCE</b>	Research has shown that for children with or at-risk for developmental delay, the earlier that intervention can be provided, the greater chance for the child's improved outcomes. By providing early intervention services to the child and family at the earliest possible time, potential later costs to society can be reduced. Wisconsin continues to fall below the expected target recommended by the Office of Special Education (OSEP) of 1.15%.
